MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENTS:

Textile sector in India is one of the oldest industries, representing rich and diverse spectrum of activities and it plays a key role in Indian economy by way of significant contribution to GDP, manufacturing output, employment generation and export earnings. Thus textile industry is one of the largest source of employment generation in the country. The global focus is shifting to India due to cost and stability factors in Textile industry. The Government's positive steps are also expected to help this shift. The consumption of the textile products in the domestic as well as international market is expected to increase in the years to come.

The encouragement for manufacturing through "Make in India programme", development of infrastructure for textile through scheme for integrated textile parks, technological upgradation fund schemes, skill development scheme and various other initiatives of Government are expected to boost textile industry in the Country. Development in the sector will eventually lead to more employment generation to unskilled or semi skilled labour and this would help to improve GDP and overall development of the society at large.

OPPORTUNITIES AND THREATS:

The Company is poised for the GST, being one nation one tax system, which would eventually create manufacturing hubs and need for location wise / state wise distribution of the manufacturing facilities would go away. This will in turn create demand for specialised and expert manufacturing facilities. The Company is already in niche area of garment manufacturing for private brands and is having state of art manufacturing facilities, including availability of backend support from its weaving division. The Company can consider expanding its manufacturing facilities, in view of the future demand by various private brands for manufacturing facilities. In apparels, the large organised manufacturing facility with latest technology is advantage of the Company but it has to compete with small and large manufacturers.

One of the threat, which all companies in this sector would be facing introduction of capital intensive new investment to take care of centralised specialised manufacturing hub by big private brands or industrial houses. However, such an investment would take some time for final implementation and such hubs would be catering to the needs of those specific private brands / industrial houses only, leaving enough pie of cake for other operators in form of smaller private brands.

The Company continues to concentrate on the domestic market and cater to products, primarily in the 'value for money' segment. The management is confident that Company's tie ups with various brands and organised retailers, would ensure continuity of orders in apparel manufacturing as well as finished fabric marketing for the Company. The Company's own brands in fabrics viz., 'True Value', and 'True Linen' have good recall value and is being continuously in demand in retail market.

Increasing costs of various input services and products is affecting the overall profitability as well as capability of the Company as well as industry to provide finished products at competitive costs in comparison to the other imported products of similar quality and specifications. The Company is doing all around efforts to minimise the effect of the increasing costs by achieving better efficiency through various employees initiative and continuous technological upgradation.

PRODUCT AND PERFORMANCE:

Textile weaving unit continues to show good performance and 'True Linen' linen fabric brand of the Company is now established brand and has a good recall value with the customers. Though 'Lombard' premium fabric brand launched couples years back received well by the customers, it was not able to scale the expected line of growth. Accordingly, the Company is taking corrective action by marketing the brand with other brands of the Company in lieu of earlier strategy of nourishing and growing the brand separately. The business of readymade garmenting unit of the Company is showing improvement.

OUTLOOK:

The Company expects to improve its performance in weaving and fabric business. In view of the better outlook for economy and in expectation of increase in overall consumption for consumer goods, the Company expects its readymade garmenting business to contribute better returns for the current financial year.

RISKS AND CONCERNS:

With change in economic scenario and prospect of the further big investment in the textile sector, the Company would be required to ensure that it delivers the value for money product at optimum price. To achieve this, the Company will have to strive hard to control its in cost of production and finance cost, hence would constrain its margin and profitability, which continues to remain the major area of concern. The said risk has been countered by better production management, innovation and tie up with various brands, organised retailers to ensure maximum capacity utilisation. The risk from competition has also been mitigated by continuing strategic partnership with the leading organised retailers.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY:

Your Company is following a proper and adequate system of internal control in respect of all its activities including safeguarding and protecting its assets against loss or unauthorized use or disposition. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing specified under Section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both issued by the ICAI. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Para 4 - Meaning of Internal Financial Controls Over Financial Reporting
